

Karndean Designflooring - Light Reflectance Values (LRV)

Guidance published in Building Regulations Part M, regarding the Disability Discrimination Act (DDA), recommends that adjacent surfaces (floors/walls/ceilings) have a LRV contrast of 30 points difference. LRV is defined as the amount of light reflected from a specific product, measured on a scale of 0-99; with 0 being a surface that perfectly absorbs all light (assumed to be totally black) and 100 is perfectly reflected (assumed to be totally white)
