Charlton Hall, Northumberland

"It was absolutely essential the floor was both luxurious and slightly off the wall,"

- Richard Shell, owner of Charlton Hall

On a secluded 150-acre estate in Northumberland sits Charlton Hall, a speakeasy wedding and private party venue with beautiful views looking out over the coast.

Looking to create a stunning place for couples to say, "I do", entrepreneur and owner Richard Shell turned to Karndean's Opus Luna and Nero to create an extraordinary bespoke floor design for the ceremony hall, housed within a Georgian barn.

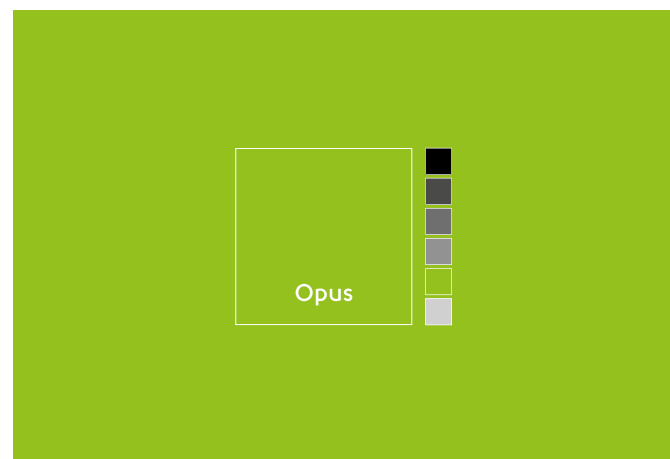

The products were hand cut on site by Shaun Baston from Total Flooring, who said: "The project took me a week to complete and involved cutting, re-bevelling and fitting simultaneously, but it's been worth it to see and hear the reactions of staff and guests."

He continued: "Karndean is an ideal product for any floor space especially as there is no limit to the design possibilities, so I would recommend it to anyone. Even if the fitter doesn't have time to hand cut intricate designs, Karndean offer an in-house laser cutting service for bespoke designs."

Richard Shell, owner of Charlton Hall added: "We wanted to add an element of surprise by choosing a design that guests wouldn't expect from a traditional building built around the late 18th century. For us it didn't matter how long it took, because we wanted it to be perfect, and I am thrilled with the end result."

Richard continued: "Charlton Hall is a very courageous venue in terms of interior design, so it was important to carry this eccentricity into the standalone ceremony hall. Karndean have an excellent reputation for being very on trend and delivering creative solutions to a client's brief, so we knew they were the perfect partner to deliver the carefully curated look that we were aiming to achieve."

The unusual art deco floor design is partnered with a romantic floral canopy suspended from the ceiling, decorative lights and contemporary acrylic chairs to seat up to 120 guests.

Richard said: "The ceremony hall is a very important consideration for couples who are choosing their wedding venue. We have already had an overwhelmingly positive reaction from couples who have seen the ceremony hall so far; in fact, it has become quite a talking point and we believe it is because the special cut floor is so striking, it will really make those wedding photographs stand out."

"When selecting the floor design, it was absolutely essential that we created a floor that was both luxurious and slightly off the wall. For functional reasons, it also had to be durable and suitable for underfloor heating at the same time. The quality of Karndean's products are second to none and the design truly captures our imagination, whilst delivering a standard of luxury that our clients will come to expect from a venue of this calibre."

Products Specified

Products: Opus Luna SP111, Nero SP115

Opus Technical Information

Thickness: 2.5mm

Wear Layer: 0.55mm

Bevel: No

Guarantee: 15 Years

Slip Resistance/Result:

DIN 51130 - R10

BS 7976 (Dry) - 66

BS 7976 (Wet) - 27
